TAGA Harmony HTA-1200 hybrid amplifier in a great review by the famous French magazine „DIAPASON”.

*"More successful than the hybrid Rogue Audio Sphynx V2, Taga stands out with its silky sound, but can also shine in the upper sound spectrum. Although the rhythms are not as clear as in Roksan or Cyrus, there is no lack of precision. The sound and musical consistency of this model remains indisputable."*

**Pros**

*Pleasant and precise sound.*

**Weak points**

*Little.*
