EXCEPTIONAL, HIGHLIGHT (TOP CLASS) "Sense of rhythm"

A rave review and the HIGHLIGHT award for the TAGA Harmony HTA-800 hybrid amplifier by the "HiFi Test", a German reputable audio magazine (06-2017).

Sense of rhythm

"The Taga hybrid amplifier masters the floorstanding loudspeakers with flying colors and delivers clear and rich performance. Thanks to a good control of the bass and silky mids the HTA-800 plays on a remarkably high level and lets acoustic instruments tune in and sound with realistic timbre."

Conclusion

"With the best-in-class processing quality and rich connection diversity for analogue and digital sources the HTA-800 hybrid amplifier from Taga is an ideal matching partner for any hi-fi system. Its pre-amp tubes provide warm sound, while a classic transistor circuit delivers powerful dynamics and performance. The HTA-800 looks great and for around 650 Euros is a real recommendation!"
